Both can be mounted to or in the ceiling. The VisionAir Blue Line 1 can also be mounted on the wall and on a movable display.

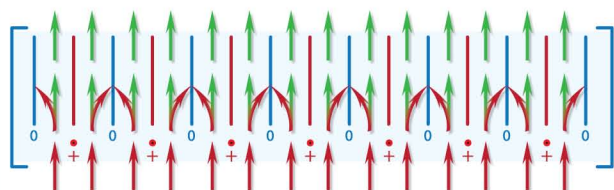

FILTER PRINCIPLE

The VisionAir Blue Line ElectroMax contains a unique filter system, which cleans indoor air in three phases.

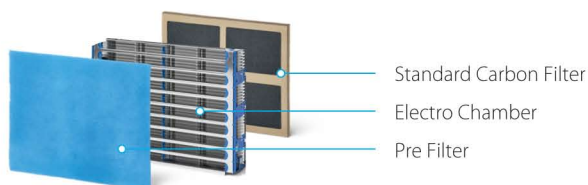

Phase 1: the **pre filter** captures the bigger particles of dust and other polluting items such as hairs and skin flakes.

Phase 2: the **Electro Chamber (EM)**. Removes air pollution to the smallest fractions. Particles are electrically charged and attach to the filter plates.

The Electro Chamber in operation:

Phase 3: finally the **Standard Carbon Filter (AC2)** adsorbs unpleasant odours and gases.
